

2009 Metrics: MWV Carbon Dioxide Emissions

MWV's commitment to sustainability extends from our corporate offices to our global manufacturing operations. We are meeting our responsibility by developing innovative new processes that make our operations more efficient and reduce our carbon footprint.

MWV COMMITMENT TO LOWER CARBON DIOXIDE EMISSIONS

We are fulfilling our responsibility to lower emissions through our voluntary, legally binding commitment to reduce direct carbon dioxide equivalents by six percent from a 1998-2001 baseline by the end of 2010 through our participation in the Chicago Climate Exchange. We share with investors our progress through such organizations as SAM for inclusion in the Dow Jones Sustainability World Index and also to the Carbon Disclosure Project (CDP), where we have publicly participated since the S&P 500 were invited to CDP4.

ABSOLUTE CARBON DIOXIDE EMISSIONS AND ENERGY USE ¹

	2005	2006	2007	2008	2009
Scope 1 – CCX Facilities Direct Emissions – CCX Protocol (metric tonnes CO ₂ equivalents) ²	2,106,565	1,991,634	1,853,834	1,865,798	1,903,262
Scope 2 – CCX Facilities Indirect Emissions – WRI/WBCSD Protocol (metric tonnes CO ₂ equivalents)	738,325	701,691	665,619	601,811	482,685
CCX Facilities Purchased Electric Power (MWh)	1,080,134	1,033,621	999,461	917,417	734,537
Percent of self generated energy from biomass or biomass-based fuels³ CCX Facilities Only	67.6%	70.0%	71.8%	69.2%	69.2%

¹ Data represent significant sites in the U.S., which are the basis for our reports to the Chicago Climate Exchange (CCX). We estimate that the 2009 CO₂ emissions reported above account for 91% of our direct CO₂ emissions globally. These numbers are adjusted to reflect only continuing MWV operations.

² MWV direct emissions data from CCX facilities are third-party verified.

³ Biomass-based fuels include wood waste and spent cooking liquor. Other sources of energy include coal, natural gas, fuel oil and propane.

NOTE: Results do not reflect the Coated Papers Group, which was sold in May 2005, and the Charleston, SC paper mill and the Potsdam, MA specialty papers plant, which were sold in 2008.
